Procaine is a benzoic acid derivative with local anesthetic and antiarrhythmic properties. Procaine binds to and inhibits voltage-gated sodium channels, thereby inhibiting the ionic flux required for the initiation and conduction of impulses. In addition, this agent increases electrical excitation threshold, reduces rate of rise of action potential and slows nerve impulse propagation thereby ...

1. Introduction. There is today a sizeable body of literature on the determinants of innovation activity. While a wide range of economic, social and technological incentives have been suggested as driving forces of innovation, there is hardly a consensus on how and to what extent innovation activity is the response to changes in the social or economic environment.
