**Relationship Development Intervention®
(RDI®) is customised for individual
children. After an initial assessment, a
consultant develops an individualised
program for a child and trains the child's
parents to implement it. The program is
made up of teaching strategies and
techniques that parents use on a daily**

[Relationship Development Intervention \(RDI\)](#)

Relationship Development Intervention (RDI) is a family-based, behavioral treatment which addresses the core symptoms of autism. It focuses on building social and emotional skills. Parents are trained as the primary therapist in most RDI programs. RDI helps people with autism form personal relationships by
